

INTRODUCING LIVETRACKER24

Sends the track to any online XC League automatically without the need of a PC

It is the answer to every pilot's need. Combining a robust reliable device with an innovative and easy to use service, adding security and fun to your activity

Designed especially for LiveTrack24 service

2 sec updates of pilots positions

Proven with 1000's of operating hours

Low mobile usage costs. It consumes 20-50 KB / hour

Battery life lasts for 8 hours continuous 2 sec tracking

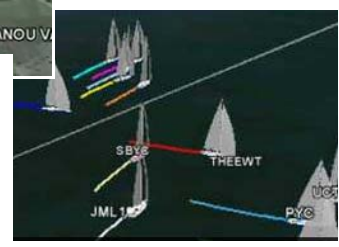

Send SOS messages with your coordinates o any group of people in case of emergency

- It is the most easy device to use for live-tracking and works 100% perfect with Livetrack24.com server.
- The pilot just has to turn it on and then off at landing (or if he has some kind of problem, press the SOS button).
- It automatically sends the track after landing to any online XC contest.
- It needs a SIM card with GPRS traffic but uses very little amount of data : a typical use is 20-50 kb / hour of flight.
- It works remarkably well in areas where other devices or phones don't have good signal.
- The GPS has very high accuracy and the device can work even when inside a harness pocket, or inside cockpit with no prob at all.

Also used for

- ⤴ MTB
- ⤴ Running
- ⤴ Sailing
- ⤴ Hiking
- ⤴ Any outdoor activity

The device is very well tested and proven to work under all conditions with many 1000's of operating hours

Pilots how have never used GPS or even varios, found this device very easy to use and now don't fly with out it anymore.

LiveTracker24 is more than a box.

GREAT SERVICE INCLUDED !!!

The Livetrack24 service gives you more than you thought was possible
