

LiveTracker24 v2

Reliable live tracking device.
Specially designed for airports.

LiveTracking for all

- ✓ LiveTracker24 is a reliable tracking device coupled with an innovative and easy to use service, adding security and fun to your activities.
- ✓ No GPS point is lost. Full tracklog recording on the server even when there is no mobile phone coverage!

Is it worth it?

There is no doubt that LiveTracking is a huge safety benefit! It's also an easy way to log your flights. Its close intergration with the LiveTrack24 service makes it incredible easy to use.

Review in Cross Country Magazine
Issue 149, September 2013

broadcast your position
in Realtime
Easy. Safe. Never get lost.

It is the answer to every pilot's livetracking needs.

Introducing the new device **LiveTracker24 v2**

one-year **FREE**
Premium Account
INCLUDED

It only needs a SIM card with GPRS traffic to send information to a central server, which can then be displayed on a map allowing others to follow your position.

It uses very little amount of data (35 kb/ hour of flight) and works 100% perfect with **Livetrack24.com** server.

REAL TIME TRACKING

Pilot's positions are reported to the server in real time with an accuracy down to a second.

UPLOAD TO ALL ONLINE XC LEAGUES

Your track can be uploaded to any XC league you choose as soon as you land with valid G-Record. No PC is needed.

A VIEW FOR EVERY NEED

Your progress can be followed in many ways, Google Earth & Maps in 2D/3D, mobile phone apps or even a text mode suitable for mobile phones with slow internet connection.

CONNECT

Communicate with your friends via SMS or messages on your personal LiveTracker24.com homepage and organize your next flight. Comment on every track and share your photos linked to it. Automatic posting to Facebook & Twitter on Track start / end helps your friends follow your progress.

ALERTS

Manual and automatic SMS can be sent to groups of people to report your status from *Need retrieval* to *Serious injury* communicating your current position.
